EDUCATION

- **KIIT University**, Bhubaneswar — *B.Tech(Mech)*

Aug 2012 - May 2016 (Full Time)

CGPA –8.61

PROJECTS

Messaging Web App—September,21

- Leveraged the **Firebase Realtime Database** to provide real time chat experience to the users.
- Users can **send text messages, images, short videos and emojis** to other users via chat.
- They can also see the **online status** of other users.
- Added **typing status** feature for better user experience.
- Implemented authentication using **Passport.js**.
- Used ReactJS for the frontend.

Twitter Clone — June,21

- Created the frontend using **ReactJS** and **authentication was implemented using JWT** (JSON Web Tokens).
- Redux was used for managing the sessions.
- Users would be able to **create a tweet ,comment on a tweet, like as well as retweet a tweet**.
- Users can also **follow or unfollow** other users.
- **Generated the feed** on the timeline based on followers and following users.
- Created server side code using **NodeJS and Express**.
- **Designed schema** for users and tweets.
- Users can perform CRUD operations on users and tweets databases.

E-commerce Website using MERN Stack — March,21

- This project has functionality **both for common users as well as for the admin** of the website.
- Admin can **add new brands, products, and product descriptions** as well as **manage the delivery status** of the orders.
- Implemented functionalities such as **search and filter products , add an item to wishlist , save to later and add to cart**.
- Users can place an order after which they can choose between **Stripe payment system or Cash On Delivery (COD)**.
- They can also **track their order status**.
- Implemented **Star Rating system and ability to add reviews** for the product.
- It uses **firebase for authentication**.
- Users can also **login through Google**.
